

# Github : Commits Convention & Types

```
<type>[optional scope]: <description>  
  
[optional body]  
  
[optional footer(s)]
```

exemple :

```
git add .  
git commit -m "type(file):description  
git push
```

**The commit type can include the following:**

- **feat** – a new feature is introduced with the changes
- **fix** – a bug fix has occurred
- **chore** – changes that do not relate to a fix or feature and don't modify src or test files (for example updating dependencies)
- **refactor** – refactored code that neither fixes a bug nor adds a feature
- **docs** – updates to documentation such as a the README or other markdown files
- **style** – changes that do not affect the meaning of the code, likely related to code formatting such as white-space, missing semi-colons, and so on.
- **test** – including new or correcting previous tests

- `perf` – performance improvements
- `ci` – continuous integration related
- `build` – changes that affect the build system or external dependencies
- `revert` – reverts a previous commit
